**RULING ON ENTITLEMENT<sup>1</sup>**

On June 7, 2021, Dawn Hobbs filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*<sup>2</sup> (the “Vaccine Act”). Petitioner alleges that she suffered a Table Injury of Guillain-Barre Syndrome (“GBS”) as a result of her influenza (“flu”) vaccination received on November 4, 2019. Petition at 1. Petitioner further alleges the vaccine was administered within the United States, that she suffered the residual effects of her injury for more than six months, and that there has been no prior award or settlement of a civil action on her behalf as a result of her injury. See Petition at ¶¶ 1, 14-16. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On July 7, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Specifically, Respondent indicates that it is his

position that petitioner has satisfied the criteria set forth in the Vaccine Injury Table ("Table") and the Qualifications and Aids to Interpretation ("QAI"), which afford petitioner a presumption of causation if the onset of GBS occurs between three and forty-two days after a seasonal flu vaccination, and there is no apparent alternative cause.

*Id.* at 8 (citing 42 C.F.R. §§ 100.3(a)(XIV)(D), 100.3(c)(15)). Respondent further agrees that "[w]ith respect to other statutory and jurisdictional issues, the records show that petitioner timely filed this case, received the flu vaccine in the United States, and satisfied the statutory severity requirement by suffering the residual effects or complications of GBS for more than six months after vaccine administration." *Id.* (citing Section 11(c)(1)(D)(i)).

**In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.**

**IT IS SO ORDERED.**
